## A MESSAGE FROM OUR CHAIRMAN & CEO

It has been an outstanding year to be involved with Rare Foods Australia as the entire team has worked tirelessly to achieve record sales and revenue while ensuring we can grow the business.

Our people are the key to a sustainable and growing business and despite skills shortages in regional WA, we have attracted quality staff and built our full-time employees by 30% over the past year. This has allowed us to develop routines that are achieving efficiency gains across the organisation while putting us in an excellent position to grow.

### STRENGTHENING THE CORE BUSINESS

During the year we sold a record 87 tonnes of Marine Stewardship Council (MSC) accredited ranched greenlip abalone. Importantly for our reputation and marketing efforts, the MSC recognised our ranching process as a wild enhanced and sustainable fishery, and we remain the only fishery globally using these practices to commercially produce greenlip abalone.

Our sales strategy, created by our Sales and Marketing General Manager Alex Wilson, is underpinned by relationships with Master Distributors in selected regions. These are customers who book tonnage in our Forward Order Book across a 12-to-24-month period and distribute to wholesalers, allowing our business to have streamlined sales channels.

During FY23 we broadened our abalone offerings to include wild greenlip, brownlip and roei. We sold a record 95.5 tonnes of abalone products during FY23, 28% higher than the previous year's record. This led to record annual sales revenue of \$5.6 million, 40% higher than in FY22, a credit to the entire Rare Foods team.

The average price received for abalone product across FY23 was \$54.7 per kg, with the MSC accredited greenlip achieving \$55.3 per kg, 8% higher than FY22.

### INCENTIVISED TO INNOVATE

Crucial to our business is our biomass growth, which is the primary objective of our Operations team.

We collect 18-month-old juveniles from our strategic partner, 888 Abalone in Bremer Bay, transport them approximately 500km to the Augusta ranch and deploy them onto the reef using our specialist Dive team. Those same abalone are harvested about three years later.

During FY23 we began improving juvenile deployment practices and have enhanced those practices to better track survival throughout FY24.

To further increase our biomass and harvest tonnages we have been developing a data base to help understand, daily, what is happening on our reef. This feeds into our "Knowledge" and "best management routine", which is being continuously refined as we gain more data and insights.

Additionally, our data and the detailed planning resulting from it which we provide to AusIndustry thereby enables us to receive R&D tax incentives, paid to us in cash.

### SUSTAINABILITY HERO OF RARE PRODUCTS FROM THE SOUTH-WEST

A highlight of the year was our founder and Executive Director Corporate Development Brad Adams winning the internationally recognised Marine Stewardship Council (MSC) "Sustainability Hero" award.

An Augusta-raised professional diver, Brad began to witness rapidly declining wild abalone stocks in Flinders Bay more than 20 years ago.

He then experimented tirelessly for more than two decades to ensure the survival of the abalone fishery and reinvigoration of the bay in the face of an industry governed by stakeholders with different agendas.

Brad's work culminated in the development of the commercial operations in Augusta that now generate 16% of the world's supply of wild greenlip abalone and we see other marine life attracted to the vibrant reef. Looking ahead, we have the potential to significantly scale our harvests as we are not subject to quotas.

## STRATEGY FOR SCALING UP

The decision to rename our business to Rare Foods Australia in 2021 was made to reflect our goal to offer other sustainably produced, premium foods from the pristine South-West region of Western Australia.

In a region that offers a rich choice of such products, we have been very discerning and focused on investigating only a “chosen few” to which we believe we can add value and that are scalable.

## OUR LATEST INNOVATION

Our first foray into another product stream has been Ocean Cellared wine which we successfully trialled in 2020 with local winery Glenarty Road.

Ocean cellaring - or maturing wine on the seabed - provides enriched flavours and the bottles develop a light covering of barnacles and coral which we call the “ocean signature”.

Aligning with our sustainability commitment, ocean cellared wines also generate fewer carbon emissions than those matured on land.

We now have formal agreements with Glenarty Road and Edwards Wines to expand this business for the local wines that can be sold at a very attractive price.

We will have 2,300 bottles of our own product available from November 2023 and are in the final stages of planning a trial to significantly lift production using a patented technique from the Northern Hemisphere.

Our Sales and Marketing team has evolved our Ocean Cellared brand and story, with a preliminary strategy developed to leverage its unique place in the market.

## CASH TO UNDERPIN OUR STRATEGY

During FY23 we generated income of \$7.5M and incurred \$8.0M in operating expenses for a net cash outflow of \$0.5M from operating activities. This was a remarkable 73% improvement in cashflow from our operating activities compared to the previous year, and a credit to the entire Rare Foods team.

Of the cash generated, \$0.2M was invested directly in growth initiatives. Another \$0.6M was invested on due diligence, with particular focus on strengthening the core business through an integrated supply chain and scaling the Ocean Cellared activities.

To ensure we could pursue our growth initiatives we extended our working capital facility with the NAB to \$2.5M and we ended FY23 with an operating loss before tax of \$0.69M.

## EFFECTIVE COMMUNICATION WITH SHAREHOLDERS AN ONGOING AIM

We now conduct a Quarterly forum with MST Access, whom we engage to write research on us to benefit the investment community. We have noticed a steady increase in attendees to our Quarterly Forum and if you are unable to join us live, we encourage you to watch the recordings online.

We urge all our shareholders to register their email details with their brokers and follow us on LinkedIn, Facebook, Instagram or X/Twitter so we can keep you informed about our progress.

Wishing you all a successful FY24.

Yours sincerely,

Brent is a member of CPA Australia and has worked with the Company as Chief Financial Officer since April 2021 and Company Secretary from May 2021.

## PRINCIPAL ACTIVITIES

The principal activities of the Consolidated Group during the financial year, included the deployment, maintenance of the artificial reef, harvesting, processing and distribution of the MSC accredited Greenlip abalone from the ocean ranching operations in Flinders Bay, Augusta Western Australia.

During the period the Company was focused on optimising its core activities in the pursuit of production growth, cost efficiencies and the development of new master distributors.

## REVIEW OF OPERATIONS AND FINANCIAL RESULTS

The Group's major activities for the year were:

- deployment of the Greenlip juvenile abalone onto the artificial reef;
- maintenance of the reefs;
- harvesting of the Greenlip abalone;
- processing, and packaging;
- optimisation of existing operations;
- R&D focused on juvenile survival and improved abalone growth rates;
- the development of additional worldwide master distributors;
- the design, construction and development of the Augusta retail outlet; and
- pursuit of both organic and value accretive growth opportunities to strengthen and scale the business.

The sales revenue generated from the sale of abalone products, ocean cellaring and abalone processing services totalled \$5.56M for the year ended 30 June 2023 (2022: \$3.97M), representing a significant 40% increase on the prior year.

The Company undertook extensive due diligence on growth opportunities to strengthen and scale the core business through FY23. In total \$0.2M was spent on positioning the core business for growth and \$0.6M was spent directly on due diligence.

As a result, the Company incurred an operating loss before tax for the year ended 30 June 2023 of \$0.69M (2022: Operating profit before tax of \$0.03M). The net loss of the Group for the year, after provision for income tax, was \$1.44M (2022: Net loss after provision for income tax was \$0.85M).

## Operations

The Company's MSC accredited operations recorded a biomass at the end of June 23 of 199 tonnes, (June 22; 203 tonnes) with the average harvest size of the abalone measuring 224g. This represents a 4% improvement on the prior year (FY22: 215g) demonstrating the maturation of the Flinders Bay ranch. The biomass asset value increased 11% on FY22, to \$8.4M (FY22: \$7.6M). These increases were underpinned by an 8% increase in the average sale price per kg and a 27% reduction in the cost to harvest, process and distribute the product.

A total 81 tonnes (FY22: 81.7 tonnes) of abalone was harvested for the year. The harvest was managed to fulfil current customer demand and ensure biomass growth to meet the growing FY24 forward order book.

Our specialist dive team deployed a total of 1.22M juvenile abalone onto the artificial reef in line with FY22 numbers of 1.27M. R&D work continued with the main focus on improving juvenile abalone survival and lifting growth rates.

With improved practices implemented to undertake recruitment, onboarding, and induction the Company continued to attract quality staff despite regional skill shortages. This work resulted in a 30% lift in full-time employees over the course of FY23.

The Company's purpose-built processing facility on the Augusta Boat Harbour processed and packed a record 117 tonnes of abalone product for FY23, a 24% improvement on prior year that delivered additional revenue, improved asset utilisation and supported the development of the Company's people.

The sales volume of 95.5 tonnes (FY22; 74.1 tonnes) of abalone product generated \$5.36M of revenue and represents a 29% uplift in quantity sold. When combined with ocean cellaring and abalone processing services, the Company achieved a 40% improvement in revenues generated compared to FY22 (FY23: \$5.56M vs FY22: \$3.97M).

## Corporate

During the year the Company's executive and management team led the implementation of the strategic choices aimed at further reducing business risk, lifting internal capabilities to continually improve the core business, generate greater margins and pursuing new revenue initiatives.

Clarity of focus and priorities has allowed the Company's executive team the time to pursue value additional growth opportunities aimed at significantly scaling the business.

## DIVIDEND PAID OR RECOMMENDED

During the financial year, the Company did not declare or pay any dividends.

## SIGNIFICANT CHANGES IN THE STATE OF AFFAIRS

There are no other significant changes in the state of affairs of the Company for the financial year, which affects the operations of the Group, the results of those operations or the state of affairs of the Group in future financial years.

## EVENTS ARISING SINCE THE END OF THE REPORTING PERIOD

There are no other significant matters sufficiently advanced or at a level of certainty since the end of the financial year, which affects the operations of the Group, the results of those operations or the state of affairs of the Group in future financial years.

## LIKELY DEVELOPMENTS AND EXPECTED RESULTS OF OPERATIONS

The Group will continue to pursue its strategic choices to:

- pursue R&D to improve abalone production;
- develop additional master distributors and further diversify bulk clients;
- grow the retail and tourism presence;
- seek increase earnings through additional aligned rare products;
- review options to deliver value from aquaculture precinct land in Esperance;
- research other rare product supply chains in the premium southwest of Western Australia that could rapidly add value for Rare Foods; and
- pursue value accretive merger and acquisition opportunities to strengthen and grow the business.

## REMUNERATION REPORT (AUDITED)

This remuneration report, which forms part of the directors' report, sets out information about the remuneration of Rare Foods Australia Limited's key management personnel for the financial year ended 30 June 2023. The term 'key management personnel' ('KMP') refers to those persons having authority and responsibility for planning, directing and controlling the activities of the Consolidated Group, directly or indirectly, including any director (whether executive or otherwise) of the Consolidated Group.

## KEY MANAGEMENT PERSONNEL

The directors and other key management personnel of the Consolidated Group during or since the end of the financial year were:

Non-Executive Directors	Position
Peter Harold	Chairman, Non-Executive Director
Ian Ricciardi	Non-Executive Director
Danielle Lee	Non-Executive Director

Executive Officers	Position
Rob Jorden	Chief Executive Officer
Brad Adams	Executive Director - Corporate Development
Brent Stockden	Chief Financial Officer, Company Secretary and Commercial Services Manager

Except as noted, the named persons held their current position for the whole of the financial year and since the end of the financial year.

## REMUNERATION POLICY AND PRINCIPLES

### Executive Director Remuneration

Executive pay and reward consist of a base fee and short-term performance incentives. Long term performance incentives may include options granted at the discretion of the Board and subject to obtaining the relevant approvals. The grant of options is designed to recognise and reward efforts as well as to provide additional incentive and may be subject to the successful completion of performance hurdles.

Executives are offered a competitive level of base pay at market rates (for comparable companies) and are reviewed annually to ensure market competitiveness.

The remuneration policy is designed to encourage superior performance and long-term commitment to the Company. At this stage of the Company's development there is no contractual performance-based remuneration.

### Non-Executive Director Remuneration

The Company's policy is to remunerate non-executive Directors at a fixed fee for time, commitment and responsibilities. Remuneration for Non-Executive Directors is not linked to individual performance. Given the Company is at its early stage of development and the financial restrictions placed on it, the Company may consider it appropriate to issue unlisted options to Non-Executive Directors, subject to obtaining the relevant approvals. This Policy is subject to annual review. All of the Directors' option holdings are fully disclosed. From time to time the Company may grant options to non-executive Directors. The grant of options is designed to recognise and reward efforts as well as to provide Non-Executive Directors with additional incentive to continue those efforts for the benefit of the Company.

Non-Executive Directors are remunerated for their services from the maximum aggregate amount (currently \$300,000 per annum) approved by shareholders for this purpose. They receive a base fee which is currently set at \$50,000 including superannuation per annum per non-executive Director and \$60,000 including superannuation per annum for the non-executive Chairman. There are no termination payments to non-executive Directors on their retirement from office.

From 9 April 2020, all Directors and Executive Management at the time, agreed to reduce their base employment benefits and directors' fees by 10% to assist in mitigating the costs of the COVID-19 pandemic. To date that variation has not been reversed.

### Executive Officer Remuneration, excluding Executive Directors

The remuneration structure for Executive Officers, excluding Executive Directors, is based on several factors, including length of service, the particular experience of the individual concerned, and the overall performance of the Company. The contracts for service between the Company and specified Executives are on a continuing basis, the terms of which are not expected to change in the immediate future. Upon retirement, Executives are paid employee benefit entitlements accrued to the date of retirement.

As an incentive, the Company has adopted an employee incentive scheme. The purpose of the employee incentive scheme is to give employees an opportunity, in the form of performance rights, to subscribe for shares. The

Directors consider the plan will enable the Company to retain and attract skilled and experienced employees and officers and provide them with the motivation to make the Company more successful.

To ensure the executive reward framework is competitive and appropriate for the results delivered, the Board has appointed a Remuneration and Nomination Committee to assist the Board by making recommendations on remuneration packages for the Groups KMP's.

The Remuneration and Nomination Committee is responsible for ensuring the KMP's reward framework aligns executive reward with the achievement of strategic objectives and the creation of value for shareholders. The Board seeks to ensure that KMP's reward is consistent with the following:

- All KMP receive a base salary (which is based on factors such as length of service and experience), superannuation, fringe benefits, options and performance incentives.
- Performance incentives are generally only paid once predetermined key performance indicators (KPIs) have been met.
- Incentives paid in the form of options or rights are intended to align the interests of the directors and Company with those of the shareholders.
- The remuneration committee reviews KMP packages annually by reference to the Consolidated Group's performance, executive performance and comparable information from industry sectors.

The performance of KMPs is measured against criteria agreed with each executive and is focused on increasing shareholder value. All bonuses and incentives are linked to predetermined performance criteria. The Board may, however, exercise its discretion in relation to approving incentives, bonuses, options or performance rights and can recommend changes to the committee's recommendations. The policy is designed to reward executives for performance leading to long-term growth in shareholder wealth.

## Performance-based Remuneration

Employee performance against their respective accountabilities is assessed annually, with measures specifically tailored to the area each individual is involved in and has a level of control over. Performance-based remuneration is aligned with target areas the Board believes hold the greatest potential to increase shareholder value, covering financial and non-financial as well as short and long-term goals.

Performance in relation to accountabilities and the Company budget are assessed annually and in line with the performance windows established as part of the employee incentive scheme. The remuneration committee review the assessment and provide a recommendation to the Board in light of the desired and actual outcomes.

## Relationship between remuneration policy and Company performance

The remuneration policy has been tailored to increase goal congruence between shareholders, directors and executives.

Rare Foods Australia Limited is in the early development phase of its operations, and due consideration is made of developing long term shareholder value. The Board has regard to the following indices in respect of the current financial year to facilitate the long-term growth of the Consolidated Group:

Item	2023	2022	2021	2020	2019
Sales Revenue (\$)	5,561,924	3,976,069	3,287,058	2,529,832	3,059,756
Biomass (Tonnes)	199	203	210	247	235
Harvest (Tonnes)	81.0	81.7	75.9	54.7	55.0

Increase/(decrease) in share price (%)	2.9%	(10%)	(17.9%)	(35.9%)	(14.3%)

## Performance Conditions Linked to Remuneration

The Consolidated Group seeks to emphasise reward incentives for results and continued commitment to the Consolidated Group through the provision of various reward schemes.

The performance-related proportions of remuneration based on these targets are included in the following table. The objective of the reward schemes is to reinforce the short and long-term goals of the Consolidated Group and provide a common interest between management and shareholders.

## ENVIRONMENTAL REGULATIONS

The Company's operations are subject to environmental regulations under Western Australian law. The Consolidated Group has procedures in place to ensure regulations are adhered to. The Consolidated Group is not aware of any breaches in relation to environmental matters.

## PROCEEDINGS ON BEHALF OF COMPANY

No legal proceedings have been brought against the Company to the date of this report.

## CORPORATE GOVERNANCE

The Company's Corporate Governance Statement is contained in the 'Corporate Governance' section of the Company's website at <https://rarefoodsaustralia.com.au/investor-reports/#corporate-governance>.

## INDEMNIFICATION AND INSURANCE OF OFFICERS AND DIRECTORS

The Company has made agreements indemnifying all the Directors and Officers of the Consolidated Group against all losses or liabilities incurred by each Director or Officer in their capacity as Directors or Officers of the Consolidated Group to the extent permitted by the *Corporations Act 2001*. The Company paid insurance premiums in respect of Directors' and Officers' Liability Insurance contracts for current officers of the Consolidated Group. The liabilities insured are damages and legal costs that may be incurred in defending civil or criminal proceedings that may be brought against the Officers in their capacity as officers of entities in the Group. The total amount of insurance premiums paid has not been disclosed due to confidentiality reasons.

## AUDIT AND NON-AUDIT SERVICES

The Board of Directors, in accordance with advice from the Audit and Risk Committee, is satisfied the provision of audit and non-audit services during the year is compatible with the general standard of independence of auditors imposed by the *Corporations Act 2001*. There were no non-audit services provided by the auditors during the year. All services provided by the external auditor or associates are reviewed and approved by the Audit and Risk Committee and/or the Board to ensure they do not adversely affect the integrity and objectivity of the auditor.

During the period BDO Corporate Tax (WA) Pty Ltd was paid \$55,801 for the provision of taxation & R&D services (2022: \$61,912). BDO Corporate Finance (WA) Pty Ltd was paid \$143,623 for due diligence and financial modelling support (2022: \$10,500). BDO Corporate Tax (WA) Pty Ltd and BDO Corporate Finance (WA) Pty Ltd are affiliate members of BDO Audit (WA) Pty Ltd. Refer to Note 21 for further details.

The board of directors has considered the position and is satisfied the provision of the non-audit services is compatible with the general standard of independence for auditors imposed by the *Corporations Act 2001*. The directors are satisfied the provision of non-audit services by the auditor, as set out in Note 21, did not compromise the auditor independence requirements of the *Corporations Act 2001* for the following reasons:

- all non-audit services have been reviewed by the board to ensure they do not impact the impartiality and objectivity of the auditor
- none of the services undermine the general principles relating to auditor independence as set out in *APES 110 Code of Ethics for Professional Accountants*

## INDEMNIFYING OF AUDITORS

No indemnities have been given, or insurance premiums paid, during or since the end of the financial year, for any person who is or has been an Auditor of the Company.

## NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2023

### NOTE 1. NATURE OF OPERATIONS OF RARE FOODS AUSTRALIA LIMITED

Rare Foods Australia Limited (the Company) and its wholly owned subsidiaries' (the Group) principal activities during the year included the harvesting of abalone, maintenance of our artificial reef, deployment of juvenile abalone to promote future harvest production and optimisation of our processing and distribution practices from our sea ranching operation in Flinders Bay, Augusta Western Australia.

### NOTE 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

#### A. Statement of compliance

These consolidated financial statements are general purpose financial statements which have been prepared in accordance with Australian Accounting Standards and Interpretations issued by the Australian Accounting Standards Board (AASB) and the *Corporations Act 2001*. These consolidated financial statements also comply with International Financial Reporting Standards as issued by the International Accounting Standards Board (IASB).

#### B. Basis of measurement

The financial report is prepared on the accruals basis and the historical cost basis, modified, where applicable, by the measurement at fair value of selected financial assets and financial liabilities. The financial statements are presented in Australian dollars, and all values are rounded to the nearest dollar unless otherwise stated.

#### C. Basis of preparation

##### i. General purpose financial report

The consolidated general purpose financial report of the Group has been prepared in accordance with the requirements of the *Corporations Act 2001*, applicable Australian Accounting Standards and other authoritative pronouncements of the Australian Accounting Standards Board. Rare Foods Australia Limited is the Group's ultimate parent company and is a for-profit entity for the purpose of preparing the financial statements. The Company is a public company limited by shares, incorporated and domiciled in Australia.

The consolidated financial statements for the financial year ended 30 June 2023 were approved and authorised for issue by the Board of Directors on 31<sup>st</sup> August 2023.

The financial statements have been prepared using the measurement bases specified by Australian Accounting Standards for each type of asset, liability, income and expense. The measurement bases are more fully described in the accounting policies below.

#### D. Basis of Consolidation

The Group financial statements consolidate those of the parent company and its subsidiaries. The parent controls a subsidiary if it is exposed, or has rights, to variable returns from its involvement with the subsidiary and has the ability to affect those returns through its power over the subsidiary. A list of subsidiaries is provided in Note 31. All subsidiaries have a reporting date of 30 June.

As at reporting date, the assets and liabilities of all controlled entities have been incorporated into the consolidated financial statements as well as their results for the year then ended. Profit or loss and other comprehensive income of subsidiaries acquired or disposed of during the year are recognised from the effective date of acquisition, or up to the effective date of disposal, as applicable.

All transactions and balances between Group companies are eliminated on consolidation, including unrealised gains and losses on transactions between Group companies. Accounting policies of subsidiaries have been changed where necessary to ensure consistency with those adopted by the parent entity.

Equity interests in a subsidiary not attributable, directly or indirectly, to the Group are presented as "non-controlling interests". The Group initially recognises non-controlling interests that are present ownership interests in subsidiaries and are entitled to a proportionate share of the subsidiary's net assets on liquidation at either fair value or at the non-controlling interests' proportionate share of the subsidiary's net assets. Subsequent to initial recognition, non-controlling interest are attributed their share of profit or loss and each component of comprehensive income. Non-controlling interests are shown separately within the equity section of the statement of financial position and statement of comprehensive income.

## E. Foreign currency translation

Foreign currency transactions during the period are converted to Australian currency using the exchange rates prevailing at the dates of the transactions. Amounts receivable and payable in foreign currency at balance date are also converted at the spot rate at each reporting date.

Realised exchange gains and losses during the period are included in the operating profit before income tax as they arise. Unrealised exchange gains and losses at balance date are included in the operating profit before income tax to the extent that their realisation is certain.

## F. Revenue

Revenue is recognised when or as a performance obligation in the contract with customer is satisfied, i.e. when the control of the goods or services underlying the particular performance obligation is transferred to the customer. A performance obligation is a promise to transfer a distinct goods or service (or a series of distinct goods or services that are substantially the same and that have the same pattern of transfer) to the customer that is explicitly stated in the contract and implied in the Group's customary business practices.

Revenue is measured at the amount of consideration to which the Group expects to be entitled in exchange for transferring the promised goods or services to the customers, excluding amounts collected on behalf of third parties such as sales taxes or services taxes. If the amount of consideration varies due to discounts, rebates, refunds, credits, incentives, penalties or other similar items, the Group estimates the amount of consideration to which it will be entitled based on the expected value or the most likely outcome. If the contract with customer contains more than one performance obligation, the amount of consideration is allocated to each performance obligation based on the relative stand-alone selling prices of the goods or services promised in the contract. Revenue is recognised to the extent that it is highly probable that a significant reversal in the amount of cumulative revenue recognised will not occur when the uncertainty associated with the variable consideration is subsequently resolved.

The control of the promised goods or services may be transferred over time or at a point in time. The control over the goods or services is transferred over time and revenue is recognised over time if:

1. the customer simultaneously receives and consumes the benefits provided by the Group's performance as the Group performs;
2. the Group's performance creates or enhances an asset that the customer controls as the asset is created or enhanced; or
3. the Group's performance does not create an asset with an alternative use and the Group has an enforceable right to payment for performance completed to date.

Revenue for performance obligations that are not satisfied over time is recognised at the point in time at which the customer obtains control of the promised goods or services.

### *i. Sale of Abalone products*

Revenue from sales of Abalone products is recognised at the point in time when control of the asset is transferred to the customer, i.e. point of delivery of goods to the customer.

### *ii. Sales of service (processing)*

Revenue from rendering processing service is recognised upon the delivery of service to the customers.

### *iii. Research and development tax incentives*

Refund amounts received or receivable under the Federal Government's Research and Development Tax Incentives are recognised on an accrual basis.

### *iv. Government grants*

Grants from the government are recognised at their fair value where there is a reasonable assurance that the grant will be received and the Group will comply with all attached conditions. Government grants relating to costs are deferred and recognised in the profit or loss over the period necessary to match them with the costs that they are intended to compensate. Government grants relating to the purchase of property, plant and equipment are included in non-current liabilities as deferred income and are credited to profit or loss on a straight-line basis over the expected lives of the related assets.

## G. Financial instruments

### Financial assets

#### Initial recognition and measurement

Financial assets are classified at initial recognition and subsequently measured at amortised cost, fair value through other comprehensive income (OCI), and fair value through profit or loss.

The classification of financial assets at initial recognition depends on the financial asset's contractual cash flow characteristics and the Group's business model for managing them. With the exception of trade receivables that do not contain a significant financing component or for which the Group has applied the practical expedient, the Group initially measures a financial asset at its fair value plus, in the case of a financial asset not at fair value through profit or loss, transaction costs. Trade receivables that do not contain a significant financing component or for which the Group has applied the practical expedient are measured at the transaction price determined under AASB 15.

In order for a financial asset to be classified and measured at amortised cost or fair value through OCI, it needs to give rise to cash flows that are 'solely payments of principal and interest (SPPI)' on the principal amount outstanding. This assessment is referred to as the SPPI test and is performed at an instrument level.

The Group's business model for managing financial assets refers to how it manages its financial assets in order to generate cash flows. The business model determines whether cash flows will result from collecting contractual cash flows, selling the financial assets, or both.

Purchases or sales of financial assets that require delivery of assets within a time frame established by regulation or convention in the market place (regular way trades) are recognised on the trade date, i.e., the date that the Group commits to purchase or sell the asset.

#### Subsequent measurement

For purposes of subsequent measurement, financial assets are classified in four categories:

- Financial assets at amortised cost (debt instruments)
- Financial assets at fair value through OCI with recycling of cumulative gains and losses (debt instruments)
- Financial assets designated at fair value through OCI with no recycling of cumulative gains and losses upon derecognition (equity instruments)
- Financial assets at fair value through profit or loss

The Group's financial assets at amortised cost includes trade receivables.

#### Financial assets at amortised cost (debt instruments)

The Group measures financial assets at amortised cost if both of the following conditions are met:

- The financial asset is held within a business model with the objective to hold financial assets in order to collect contractual cash flows; and
- The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding

#### Financial assets at fair value through OCI (debt instruments)

The Group measures debt instruments at fair value through OCI if both of the following conditions are met:

- The financial asset is held within a business model with the objective of both holding to collect contractual cash flows and selling and
- The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

For debt instruments at fair value through OCI, interest income, foreign exchange revaluation and impairment losses or reversals are recognised in the statement of profit or loss and computed in the same manner as for financial assets measured at amortised cost.

The remaining fair value changes are recognised in OCI. Upon derecognition, the cumulative fair value change recognised in OCI is recycled to profit or loss.

### Financial assets designated at fair value through OCI (equity instruments)

Upon initial recognition, the Group can elect to classify irrevocably its equity investments as equity instruments designated at fair value through OCI when they meet the definition of equity under AASB 132 *Financial Instruments: Presentation* and are not held for trading. The classification is determined on an instrument-by-instrument basis.

Gains and losses on these financial assets are never recycled to profit or loss. Dividends are recognised as other income in the statement of profit or loss when the right of payment has been established, except when the Group benefits from such proceeds as a recovery of part of the cost of the financial asset, in which case, such gains are recorded in OCI. Equity instruments designated at fair value through OCI are not subject to impairment assessment.

### Financial assets at fair value through profit or loss

Financial assets at fair value through profit or loss include financial assets held for trading, financial assets designated upon initial recognition at fair value through profit or loss, or financial assets mandatorily required to be measured at fair value. Financial assets are classified as held for trading if they are acquired for the purpose of selling or repurchasing in the near term. Derivatives, including separated embedded derivatives, are also classified as held for trading unless they are designated as effective hedging instruments. Financial assets with cash flows that are not solely payments of principal and interest are classified and measured at fair value through profit or loss, irrespective of the business model. Notwithstanding the criteria for debt instruments to be classified at amortised cost or at fair value through OCI, as described above, debt instruments may be designated at fair value through profit or loss on initial recognition if doing so eliminates, or significantly reduces, an accounting mismatch.

Financial assets at fair value through profit or loss are carried in the statement of financial position at fair value with net changes in fair value recognised in the statement of profit or loss.

This category includes derivative instruments and listed equity investments which the Group had not irrevocably elected to classify at fair value through OCI. Dividends on listed equity investments are also recognised as other income in the statement of profit or loss when the right of payment has been established.

A derivative embedded in a hybrid contract, with a financial liability or non-financial host, is separated from the host and accounted for as a separate derivative if: the economic characteristics and risks are not closely related to the host; a separate instrument with the same terms as the embedded derivative would meet the definition of a derivative; and the hybrid contract is not measured at fair value through profit or loss. Embedded derivatives are measured at fair value with changes in fair value recognised in profit or loss. Reassessment only occurs if there is either a change in the terms of the contract that significantly modifies the cash flows that would otherwise be required or a reclassification of a financial asset out of the fair value through profit or loss category.

A derivative embedded within a hybrid contract containing a financial asset host is not accounted for separately. The financial asset host together with the embedded derivative is required to be classified in its entirety as a financial asset at fair value through profit or loss.

### Derecognition

A financial asset (or, where applicable, a part of a financial asset or part of a group of similar financial assets) is primarily derecognised (i.e., removed from the Group's consolidated statement of financial position) when:

- The rights to receive cash flows from the asset have expired; or
- The Group has transferred its rights to receive cash flows from the asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a 'pass-through' arrangement; and either (a) the Group has transferred substantially all the risks and rewards of the asset, or (b) the Group has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

When the Group has transferred its rights to receive cash flows from an asset or has entered into a pass-through arrangement, it evaluates if, and to what extent, it has retained the risks and rewards of ownership. When it has neither transferred nor retained substantially all of the risks and rewards of the asset, nor transferred control of the asset, the Group continues to recognise the transferred asset to the extent of its continuing involvement. In that case, the Group also recognises an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the Group has retained.

Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration that the Group could be required to repay.

## Impairment of financial assets

The Group recognises an allowance for expected credit losses (ECLs) for all debt instruments not held at fair value through profit or loss. ECLs are based on the difference between the contractual cash flows due in accordance with the contract and all the cash flows that the Group expects to receive, discounted at an approximation of the original effective interest rate. The expected cash flows will include cash flows from the sale of collateral held or other credit enhancements that are integral to the contractual terms.

ECLs are recognised in two stages. For credit exposures for which there has not been a significant increase in credit risk since initial recognition, ECLs are provided for credit losses that result from default events that are possible within the next 12-months (a 12-month ECL). For those credit exposures for which there has been a significant increase in credit risk since initial recognition, a loss allowance is required for credit losses expected over the remaining life of the exposure, irrespective of the timing of the default (a lifetime ECL).

For trade receivables and contract assets, the Group applies a simplified approach in calculating ECLs. Therefore, the Group does not track changes in credit risk, but instead recognises a loss allowance based on lifetime ECLs at each reporting date. The Group has established a provision matrix that is based on its historical credit loss experience, adjusted for forward-looking factors specific to the debtors and the economic environment.

For debt instruments at fair value through OCI, the Group applies the low credit risk simplification. At every reporting date, the Group evaluates whether the debt instrument is considered to have low credit risk using all reasonable and supportable information that is available without undue cost or effort. In making that evaluation, the Group reassesses the internal credit rating of the debt instrument. In addition, the Group considers that there has been a significant increase in credit risk when contractual payments are more than 30 days past due.

The Group considers a financial asset in default when contractual payments are 90 days past due. However, in certain cases, the Group may also consider a financial asset to be in default when internal or external information indicates that the Group is unlikely to receive the outstanding contractual amounts in full before taking into account any credit enhancements held by the Group. A financial asset is written off when there is no reasonable expectation of recovering the contractual cash flows.

## **Financial Liabilities**

### Initial recognition and measurement

Financial liabilities are classified, at initial recognition, as financial liabilities at fair value through profit or loss, loans and borrowings, payables, or as derivatives designated as hedging instruments in an effective hedge, as appropriate.

All financial liabilities are recognised initially at fair value and, in the case of loans and borrowings and payables, net of directly attributable transaction costs.

The Group's financial liabilities include trade and other payables, loans and borrowings including bank overdrafts, and derivative financial instruments.

### Subsequent measurement

The measurement of financial liabilities depends on their classification, as described below:

#### Financial liabilities at fair value through profit or loss

Financial liabilities at fair value through profit or loss include financial liabilities held for trading and financial liabilities designated upon initial recognition as at fair value through profit or loss.

Financial liabilities are classified as held for trading if they are incurred for the purpose of repurchasing in the near term. This category also includes derivative financial instruments entered into by the Group that are not designated as hedging instruments in hedge relationships as defined by AASB 9. Separated embedded derivatives are also classified as held for trading unless they are designated as effective hedging instruments.

Gains or losses on liabilities held for trading are recognised in the statement of profit or loss.

Financial liabilities designated upon initial recognition at fair value through profit or loss are designated at the initial date of recognition, and only if the criteria in AASB 9 are satisfied. The Group has not designated any financial liability as at fair value through profit or loss.

### Loans and borrowings

After initial recognition, interest-bearing loans and borrowings are subsequently measured at amortised cost using the effective interest rate method. Gains and losses are recognised in profit or loss when the liabilities are derecognised as well as through the effective interest rate amortisation process.

Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the effective interest rate. The effective interest rate amortisation is included as finance costs in the statement of profit or loss.

This category generally applies to interest-bearing loans and borrowings.

### Derecognition

A financial liability is derecognised when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the derecognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognised in the statement of profit or loss.

### **Offsetting of financial instruments**

Financial assets and financial liabilities are offset and the net amount is reported in the consolidated statement of financial position if there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, to realise the assets and settle the liabilities simultaneously.

## **H. Employee benefits**

Provision is made for the Company's liability for employee benefits arising from services rendered by employees to balance date. Employee benefits that are expected to be settled within one year have been measured at the amounts expected to be paid when the liability is settled, plus related on-costs. Employee benefits payable later than one year have been measured at the present value of the estimated future cash outflows to be made for those benefits.

## **I. Income tax**

The income tax expense or revenue for the period is the tax payable on the current period's taxable income based on the applicable income tax rate for each jurisdiction adjusted by changes in deferred tax assets and liabilities attributable to temporary differences and to unused tax losses.

The Group's subsidiaries, together with the Company, intend to form a tax consolidated group for income tax purposes with Rare Foods Australia Ltd. as the Head Company. These entities form part of the tax funding and sharing agreement. In accordance with the tax funding agreement, the current and deferred tax balances are recognised by each party using a modified standalone payer allocation approach. The Head Company recognises current tax liabilities or assets, and deferred tax arising from unused tax losses and unused relevant tax credits, assumed from the tax funding contributing members. The contributing members recognise deferred taxes relating to temporary differences. The assets or liabilities arising under tax funding agreements with the tax consolidated entities are recognised as amounts receivable from or payable to other entities in the tax consolidated group. The tax funding arrangement ensures that the intercompany charge equals the current tax liability or benefit of each tax consolidated group member, resulting in neither a contribution by the head entity to the subsidiaries nor a distribution by the subsidiaries to the head entity.

The current income tax charge is calculated on the basis of the tax laws enacted or substantively enacted at the end of the reporting period in the countries where the Company's subsidiaries and associates operate and generate taxable income. Management periodically evaluates positions taken in tax returns with respect to situations in which applicable tax regulation is subject to interpretation. It establishes provisions where appropriate on the basis of amounts expected to be paid to the tax authorities.

Deferred income tax is provided in full, using the liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the consolidated financial statements. However, deferred tax liabilities are not recognised if they arise from the initial recognition of goodwill. Deferred income tax is also not accounted for if it arises from initial recognition of an asset or liability in a transaction other than a business combination that at the time of the transaction affects neither accounting nor taxable profit or loss. Deferred income tax is determined using tax rates (and laws) that have been enacted or substantively enacted by

the end of the reporting period and are expected to apply when the related deferred income tax asset is realised or the deferred income tax liability is settled.

Deferred tax assets are recognised for deductible temporary differences and unused tax losses only if it is probable that future taxable amounts will be available to utilise those temporary differences and losses.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to offset current tax assets and liabilities and when the deferred tax balances relate to the same taxation authority. Current tax assets and tax liabilities are offset where the entity has a legally enforceable right to offset and intends either to settle on a net basis, or to realise the asset and settle the liability simultaneously.

Current and deferred tax is recognised in profit or loss, except to the extent that it relates to items recognised in other comprehensive income or directly in equity. In this case, the tax is also recognised in other comprehensive income or directly in equity, respectively.

## **J. Good and Services Tax (GST)**

Revenues, expenses and assets are recognised net of the amount of associated GST, unless the GST incurred is not recoverable from the taxation authority. In this case it is recognised as part of the cost of acquisition of the asset or as part of the expense.

Receivables and payables are stated inclusive of the amount of GST receivable or payable. The net amount of GST recoverable from, or payable to, the taxation authority is included with other receivables or payables in the balance sheet.

Cash flows are presented on a gross basis. The GST components of cash flows arising from investing or financing activities which are recoverable from, or payable to the taxation authority, are presented as operating cash flows.

## **K. Cash and cash equivalents**

Cash and cash equivalents in the Statement of Financial Position includes cash on hand, deposits held at call with banks and other highly liquid investments that are readily convertible into known amounts of cash and which are subject to an insignificant risk of changes in value. For the purposes of the Statement of Cash Flows, cash and cash equivalents are as described above.

## **L. Trade and other receivables**

Trade receivables are amounts due from customers for goods sold or services performed in the ordinary course of business. They are generally due for settlement within 30 days and therefore are all classified as current. Trade receivables are recognised initially at the amount of consideration that is unconditional unless they contain significant financing components, when they are recognised at fair value. The group holds the trade receivables with the objective to collect the contractual cash flows and therefore measures them subsequently at amortised cost using the effective interest method. Details about the group's impairment policies and the calculation of the expected credit loss allowance are provided in note 2(g).

## **M. Government grants**

Government grants relating to costs are deferred and recognised in profit or loss over the period necessary to match them with the costs that they are intended to compensate.

## **N. Inventories**

Inventories are measured at the lower of cost and net realisable value. Costs include all expenses directly attributable to the manufacturing process. Costs are assigned on the basis of weighted average costs. In the case of abalone stock, upon harvest the stock is transferred from Biological Assets to Inventory at a revised cost value, being the carrying value previously determined for that stock in accordance with the AASB 141 (refer Note 2(p) below). Net realisable value is the estimated selling price in the ordinary course of business less any applicable selling expense.

## **O. Leases**

All leases are accounted for by recognising a right-of-use asset and a lease liability except for:

- leases of low value assets; and
- leases with a term of 12 months or less.

Lease liabilities are measured at the present value of the contractual payments due to the lessor over the lease term, with the discount rate determined by reference to the rate inherent in the lease unless (as is typically the case) this is not readily determinable, in which case the group's incremental borrowing rate on commencement of the lease is used. Variable lease payments are only included in the measurement of the lease liability if they depend on an index or rate. In such cases, the initial measurement of the lease liability assumes the variable element will remain unchanged throughout the lease term. Other variable lease payments are expensed in the period to which they relate.

On initial recognition, the carrying value of the lease liability also includes:

- amounts expected to be payable under any residual value guarantee;
- the exercise price of any purchase option granted in favour of the group if it is reasonable certain to assess that option; and
- any penalties payable for terminating the lease, if the term of the lease has been estimated on the basis of termination option being exercised.

Right of use assets are initially measured at the amount of the lease liability, reduced for any lease incentives received, and increased for:

- lease payments made at or before commencement of the lease;
- initial direct costs incurred; and
- the amount of any provision recognised where the group is required to dismantle, remove or restore the leased asset.

Subsequent to initial measurement lease liabilities increase as a result of interest charged at a constant rate on the balance outstanding and are reduced for lease payments made. Right-of-use assets are amortised on a straight-line basis over the remaining term of the lease or over the remaining economic life of the asset if, rarely, this is judged to be shorter than the lease term.

When the group revises its estimate of the term of any lease (because, for example, it re-assesses the probability of a lessee extension or termination option being exercised), it adjusts the carrying amount of the lease liability to reflect the payments to make over the revised term, which are discounted using a revised discount rate (being the interest rate implicit in the lease for the remainder of the lease term or, if that cannot be readily determined, the Group's incremental borrowing rate at the re-assessment date). An equivalent adjustment is made to the carrying value of the right-of-use asset, with the revised carrying amount being amortised over the remaining (revised) lease term.

The carrying value of lease liabilities is also revised when the variable element of future lease payments dependent on a rate or index is revised or there is a revision to the estimate of amounts payable under a residual value guarantee. In both cases an unchanged discount rate is used. In both cases an equivalent adjustment is made to the carrying value of the right-of-use asset, with the revised carrying amount being amortised over the remaining (revised) lease term.

When the group renegotiates the contractual terms of a lease with the lessor, the accounting depends on the nature of the modification:

- if the renegotiation results in one or more additional assets being leased for an amount commensurate with the standalone price for the additional rights-of-use obtained, the modification is accounted for as a separate lease in accordance with the above policy
- in all other cases where the renegotiated increases the scope of the lease (whether that is an extension to the lease term, or one or more additional assets being leased), the lease liability is remeasured using the discount rate applicable on the modification date, with the right-of-use asset being adjusted by the same amount.
- if the renegotiation results in a decrease in the scope of the lease, both the carrying amount of the lease liability and right-of-use asset are reduced by the same proportion to reflect the partial of full termination of the lease with any difference recognised in profit or loss. The lease liability is then further adjusted to ensure its carrying amount reflects the amount of the renegotiated payments over the renegotiated term, with the modified lease payments discounted at the rate applicable on the modification date. The right-of-use asset is adjusted by the same amount.

Payments associated with short-term leases and leases of low-value assets are recognised on a straight-line basis as an expense in profit or loss. Short-term leases are leases with a lease term of 12 months or less. Low-value assets are items such as IT-equipment and small items of office furniture.

## P. Biological Assets

Biological assets comprise abalone stock located on Abitats.

Pursuant to AASB 141 Agriculture standard, abalone stock are valued at the end of each half and full-year reporting periods at their fair value less costs to sell. Where fair value cannot be reliably measured, biological assets are measured at cost less impairment losses.

For abalone stock below 90mm (~120g whole weight), these biological assets are measured at cost as the Company considers that the fair value for this stock cannot be reliably measured on the basis that its commercial sales are only for product above this size threshold.

Abalone stock above 90mm (~120g whole weight) are measured at fair value less cost to sell. The valuation takes into consideration estimated growth rates and mortality (refer Note 2(u) for a description of the methodology used for the estimation of growth rates and mortality rates). The market prices are derived from observable market prices (when available) and realised prices. The prices are reduced for estimated harvesting costs, processing costs, freight costs and other selling costs, to determine the net fair value.

The net increase / (decrease) in the fair value of abalone stock at period end is recognised as income / (expense) in the profit and loss.

## Q. Property, plant and equipment

Property, plant and equipment is initially recognised at acquisition cost or manufacturing cost, including any costs directly attributable to bringing the assets to the location and condition necessary for it to be capable of operating in a manner intended by the Group's management. These assets are subsequently measured at cost less and depreciation and impairment losses.

Repairs and maintenance expenditure is charged to the Statement of Profit or Loss and Other Comprehensive Income during the financial period in which it is incurred.

### Depreciation

The depreciable amount of fixed assets are depreciated on either a diminishing value (DV) method or on a straight-line (SL) basis over their useful lives to the Group commencing from the time the asset is held ready for use. The following depreciation rates were applied during the financial period:

- Plant and equipment                      13 - 20% SL
- IT & Office equipment                      10% - 50% DV
- Land & Buildings                              4 - 13% SL

The assets' residual values and useful lives are reviewed, and adjusted if appropriate, at each reporting date.

### Derecognition

Additions of property, plant and equipment is derecognised upon disposal or when no further future economic benefits are expected from its use or disposal. Gains and losses on disposals are determined by comparing proceeds with the carrying amount. These gains and losses are recognised in the Statement of Profit or Loss and Other Comprehensive Income.

### Impairment

Carrying values of plant and equipment are reviewed at each balance date to determine whether there are any objective indicators of impairment that may indicate the carrying values may be impaired.

## R. Trade and other payables

Trade and other payables represent liabilities for goods and services provided to the Company prior to the end of the financial year which are unpaid. The amounts are unsecured and are usually paid within 30 days of recognition.

## S. Borrowings

Borrowings are initially recognised at fair value, net of transaction costs incurred. Borrowings are subsequently measured at amortised cost. Any difference between the proceeds (net of transaction costs) and the redemption amount is recognised in profit or loss over the period of the borrowings using the effective interest method. Fees paid on the establishment of loan facilities are recognised as transaction costs of the loan to the extent that it is probable that some or all of the facility will be drawn down. In this case, the fee is deferred until the draw down occurs. To the extent there is no evidence that it is probable that some or all of the facility will be drawn down, the fee is capitalised as a prepayment for liquidity services and amortised over the period of the facility to which it relates.

## T. Provisions

Provisions are recognised when the entity has a legal or constructive obligation, as a result of past events, for which it is probable that an outflow of economic benefits will result and that outflow can be reliably measured.

## U. Critical accounting estimates and judgments

Estimates and judgements are continually evaluated and are based on historical experience and other factors, including expectations of future events that may have a financial impact on the entity and that are believed to be reasonable under the circumstances.

The Group makes estimates and assumptions concerning the future. The resulting accounting estimates will, by definition, seldom equal the related actual results. The estimates and assumptions that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year are discussed below.

### Biological Assets

Biological assets are measured at fair value less cost to sell in accordance with AASB 141. Abalone stock below 90mm (~120g) are measured at the same rate per mm as the rate charged to the Company by the supplier. Management estimates this is a more accurate reflection of fair value as it takes into consideration growth rates from approximately 40mm to 90mm.

Abalone stock above 90mm (120g) is measured at fair value in accordance with AASB 141. Management estimates the fair value of biological assets, taking into account the most reliable evidence available at each reporting date in relation to the underlying assumptions, including mortality rates, growth rates, calculation of biomass, harvest costs, processing costs, selling costs and market prices.

Biomass is calculated using a size/weight algorithm derived from industry reports. In relation to the assumptions underlying mortality rates and growth rates, from which the stock estimates are extrapolated, including biomass, these are updated following each six-monthly survival count and size class measurements. The bi-annual stock counts and measurements are taken over approximately 6% of the entire ranch, which has been determined to be a statistically relevant sample size.

The future realisation of these biological assets may be affected by any variance between actual results and the assumptions relied upon.

### Net realisable value of inventories

The net realisable value of inventories assessment required a degree of estimation and judgement by taking into account the recent sales experience, the ageing of inventories and other factors that affect inventory obsolescence. The quality of inventory is also taken into account in the assessment of net realisable value.

### Share based payments

The fair value of equity instruments provided to Directors, employees and services providers are calculated from the date they are granted utilising the Black and Scholes option pricing model. The fair value of the equity-settled share-based payments is expensed on a straight-line basis over the vesting period, based on management's estimate of the probability that shares that will eventually vest. For the purposes of the financial statements, the Group has recognised a share-based payment expense for the relevant performance period, based on the assessed probability of the relevant performance conditions being met.

### Fair value measurement hierarchy

The consolidated entity is required to classify all assets and liabilities, measured at fair value, using a three level hierarchy, based on the lowest level of input that is significant to the entire fair value measurement, being: Level 1: Quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date; Level 2: Inputs other than quoted prices included within Level 1 that are observable for the

asset or liability, either directly or indirectly; and Level 3: Unobservable inputs for the asset or liability. Considerable judgement is required to determine what is significant to fair value and therefore which category the asset or liability is placed in can be subjective.

The fair value of assets and liabilities classified as level 3 is determined by the use of valuation models. These include discounted cash flow analysis or the use of observable inputs that require significant adjustments based on unobservable inputs.

### **Impairment**

In assessing impairment, management estimates the recoverable amount of each asset or cash generating unit based on expected future cash flows and uses an interest rate to discount them (where applicable). Estimation uncertainty relates to assumptions about future operating results and the determination of a suitable discount rate (if applicable).

### **Useful life of depreciable assets**

Management reviews its estimate of the useful lives of depreciable assets at each reporting date, based on the expected useful life of the assets. Uncertainties in these estimates include assessing the impact of the Company's operating environment and technical and other forms of obsolescence.

### **Incremental borrowing rate**

Where the interest rate implicit in a lease cannot be readily determined, an incremental borrowing rate is estimated to discount future lease payments to measure the present value of the lease liability at the lease commencement date. Such a rate is based on what the entity estimates it would have to pay a third party to borrow the funds necessary to obtain an asset of a similar value to the right-of-use asset, with similar terms, security and economic environment.

## **V. Going concern**

The financial statements for the year ended 30 June 2023 have been prepared on the basis that the group is a going concern and therefore, contemplates the continuity of normal business activity, realisation of assets and settlement of liabilities in the normal course of business.

During the year the group recorded a net loss after tax of \$1,445,485 (2022: net loss after tax \$854,972) and had net cash outflows from operating activities of \$483,070 (2022: \$1,756,719 net cash outflows). At balance date the group has working capital of \$5,530,075 (2022: \$5,338,580).

These conditions indicate a material uncertainty that may cast a significant doubt about the Group's ability to continue as a going concern and, therefore, that it may be unable to realise its assets and discharge its liabilities in the normal course of business.

The Group's ability to continue as a going concern is dependent upon meeting future revenue and harvesting targets, its ability to generate cash flow through its business operations and the ability to raise additional finance from debt or equity if and when required, to contribute to the Group's working capital position. The Directors continue to be focused on meeting the Group's business objectives and are mindful of the funding requirements to meet these objectives.

The Directors at the date of preparing these annual accounts, have reasonable grounds to believe that the Group will continue as a going concern, dependent on the following:

- The International market for abalone maintaining existing demand levels resulting in the achievement of future sales targets;
- Receipting the annual Ausindustry research and development refund included within the receivables balance as at 30 June 2023.
- Scaling back certain activities that are non-essential so as to conserve cash; and
- The ability to raise additional finance from debt or equity if and when required, to contribute to the Group's working capital position.

Should the entity not be able to continue as a going concern it may be required to realise its assets and discharge its liabilities other than in the ordinary course of business, and at amounts that differ from those stated in the financial statements. The financial report does not include any adjustments relating to the recoverability or classification of recorded asset amounts, nor the amounts or classification of liabilities that might be necessary should the Group not be able to continue as a going concern.

**W. Share-based payments**

The Company provides benefits to senior executives of the Company in the form of share-based payments. The cost of these share-based payments is measured by reference to the fair value of the equity instruments at the date at which they are granted. The fair value at grant date is measured by use of the Black and Scholes option pricing model. The expected life used in the model has been adjusted, based on management's best estimate, for the effects of non-transferability, exercise restrictions, and behavioural considerations. The fair value determined at the grant date of the equity-settled share-based payments is expensed on a straight-line basis over the vesting period, based on the entity's estimate of shares that will eventually vest.

**X. New accounting standards and interpretations not yet mandatory or early adopted**

Australian Accounting Standards and Interpretations that have recently been issued or amended but are not yet mandatory, have not been early adopted by the consolidated entity for the annual reporting period ended 30 June 2023.

There are no other significant Australian Accounting Standards and Interpretations that were recently issued or amended but are not yet effective and have not been early adopted by the Group for the year ended 30 June 2023.

## NOTE 8. BIOLOGICAL ASSETS (CONTINUED)

**Consolidated Group**  
**2023**                      **2022**  
**\$**                              **\$**

The carrying value of abalone on hand at year end was calculated as follows:

Opening balance	7,566,684	6,273,395
Increases due to purchases	1,752,606	1,732,619
Decreases due to harvest for processing to inventory	(3,881,750)	(2,451,200)
Fair value adjustment at year end recognised in profit and loss	2,980,490	2,011,870
<b>Closing balance</b>	<b>8,418,031</b>	<b>7,566,684</b>

The fair value adjustment that occurred in the financial year of \$2,980,490 was predominantly due to improved sales prices achieved, reductions in the costs to complete and growth in the average abalone sizes. Despite the net reduction in Biomass, these factors have translated into a positive contribution to the profit and loss of \$2,980,490.

The classification of the closing biological stock between current and non-current is based on the estimated harvest potential for the following 12-month period, which will be sourced from within the closing stock above 90mm.

Abalone stock below 90mm (~120g) are valued at a per mm rate. Management estimates this is a more accurate reflection of fair value as it takes into consideration growth rates from approximately 40mm to 90mm.

Stock above 90mm is measured at fair market value less costs to sell. The fair value assessment also assumes a further 10% mortality rate between balance date and harvest date. As these valuation variables are unobservable, they are deemed Level 3 inputs.

Level 3 analysis: The finance and operational departments undertake the valuation of the abalone. The calculations are considered to be level 3 fair values. The data is taken from internal management reporting and work completed by the executives within the operations to determine material inputs of the model. The key inputs are agreed by the Board of Directors every six months. The following table summarises the quantitative information about the significant unobservable inputs used in level 3 fair value measurements:

Description	30 June 2023	30 June 2022	Comments
Selling price	Based on estimated market price at year end	Based on estimated market price at year end	Obtained by analysing sales prices and market research
Percentage increase/(decrease) from previous year selling price	8%	19%	Obtained by analysing sales prices and market research
Weight of live abalone	Adjusted weight of live abalone for fair value measurement: 147,402 kg	Adjusted weight of live abalone for fair value measurement: 158,463 kg	Based on the results from the stocktake procedures
Costs to complete	\$7.35/Kg	\$10/Kg	Based on historical data over the last 12 months
Mortality	10% of >90mm animals	10% of >90mm animals	Based on historical research

**NOTE 8. BIOLOGICAL ASSETS (CONTINUED)**

The valuation of the biological assets requires the estimate of the closing number of abalone and biomass and hence the resultant fair value estimate for closing stock. As detailed in Note 2(u), the number of abalone and biomass is estimated using a model that factors in projected growth and mortality rates, which in turn are based on the results of survival counts and size class measurements taken during the Company's trial phase and subsequent six-monthly stock counts (based upon a 6% sample). Actual growth and mortality rates will invariably differ to some extent across the ranch.

The following tables summarises the number of <90mm animals for current year and prior year and number of >90mm animals for current year and prior year:

No of Abalone	30 June 2023	30 June 2022
< 90mm	673,817	589,091
> 90mm	874,600	919,010
<b>Total</b>	<b>1,548,417</b>	<b>1,508,101</b>

**Sensitivity analysis - Biological assets**

The following tables summarise the potential impact of changes in the key variables on the biological asset valuation:

	-10%	10%
Selling price	(\$815,133)	\$815,133
Weight of live abalone	(\$706,793)	\$706,793

**NOTE 9. INVENTORY**

	Consolidated Group	
	2023	2022
	\$	\$
Harvested stock	670,570	835,597
Ocean Cellared produce	10,477	1,302
Ocean Pantry retail stock	6,282	-
	<b>687,329</b>	<b>836,899</b>

Inventory is stated at the lower of cost (value at harvest time on valuation of biological assets) or net realisable value. The inventory balance includes an allocation of harvest and processing costs (deferred cost of production). These costs are capitalised and carried forward to harvested stock and subsequently cost of goods sold when the product is eventually sold.

## NOTE 22. PROFIT/(LOSS) PER SHARE

The calculation of basic and diluted profit/(loss) per share was based on the following:

	<b>Consolidated Group</b>	
	<b>2023</b>	<b>2022</b>
	<b>\$</b>	<b>\$</b>
Net (loss) for the year attributable to owners of the Company	<u>(1,444,577)</u>	<u>(853,430)</u>

Effect of dilution:		
Share options	-	-
Convertible loans	<u>n/a</u>	<u>n/a</u>
Adjusted weighted average number of ordinary shares used in calculating diluted (loss) per share	<u>202,295,151</u>	<u>200,742,780</u>
Basic and diluted (loss) per share (cents)	<u>(0.71)</u>	<u>(0.43)</u>

There is no impact from the 3,000,000 options outstanding at 30 June 2023 (2022: 3,000,000 options) on the profit per share calculation because they are anti-dilutive. These options could potentially dilute basic EPS in the future.

### Market Risk

Market risk is the risk that changes in market prices, such as foreign exchange rates and interest rates will affect the Consolidated Group's income or the value of its holding of financial instruments. The Consolidated Group's objective is to manage and control market risk exposures within acceptable parameters, whilst optimising returns.

### Currency Risk

The Consolidated Group is exposed to currency risk on overseas sales of abalone product and associated selling costs that are denominated in US dollars. The Consolidated Group does not have any overseas borrowings or US dollar cash holdings as at balance date. In order to protect against exchange rate movements, the consolidated group from time to time has entered into forward foreign exchange contracts with its banking provider. The Consolidated Group had a no USD debtor balance (2022: \$44,070) and no USD creditor balance at 30 June 2023 (2022: \$3,402).

## NOTE 26. FINANCIAL INSTRUMENTS AND FINANCIAL RISK MANAGEMENT (CONTINUED)

### Credit Risk

Credit risk represents the risk of financial loss to the Consolidated Group if a customer or counterparty to the financial instrument fails to meet its contractual obligations and arises principally from the Consolidated Group's receivables from customers. This in turn is influenced by the characteristics of each customer and the Consolidated Group regularly assesses the creditworthiness of its customers.

The Consolidated Group regularly reviews its trade and other receivables balances for impairment. At the reporting date, there were no trade and other receivables were past due or impaired (2022: \$nil).

The Consolidated Group's maximum exposure to credit risk at the reporting date was:

<sup>1</sup> The equivalent S&P rating of the financial assets and deposits represents the rating of the counterparty with whom the financial asset is held rather than the rating of the financial asset itself. NAB has a rating of A-1+ (short-term) and AA- (long-term). CBA has a credit rating of A-1+ (short-term) and AA- (long-term). Bendigo Bank has a rating of A-2 (short-term) and BBB+ (long-term).

<sup>2</sup> Includes trade receivables of \$146,494 (FY2022: \$132,500). Other receivables include net amounts owing from Government institutions of \$1,807,831 (FY2022: \$1,829,733).

## NOTE 26. FINANCIAL INSTRUMENTS AND FINANCIAL RISK MANAGEMENT (CONTINUED)

### Liquidity Risk

Liquidity risk arises from the financial liabilities of the Consolidated Group and its ability to meet their obligations to repay their financial liabilities as and when they fall due. The Consolidated Group manages liquidity risk by maintaining adequate reserves and monitoring budgeted and actual cash flows and matching the maturity profiles of financial assets, expenditure commitments and liabilities.

### Maturity of financial liabilities

The table below reflects an undiscounted contractual maturity analysis for financial liabilities:

Balances due within 12 months equal their carrying balances as the impact of discounting is not significant.

### Fair Value Measurement of financial instruments

Note 2(G) summarises the Consolidated Group's approach to fair value assessment of its assets and liabilities. The carrying amount of the Consolidated Group's financial instruments are assumed to approximate their fair value due to either the short-term nature or their terms and conditions.

### Capital Risk Management

The Group's objectives when managing capital are to safeguard their ability to continue as a going concern, so that they can continue to provide returns to shareholders and benefits for other stakeholders and to maintain an optimal capital structure to reduce the cost of capital. In order to maintain or adjust the capital structure, the Group may adjust the amount of dividends paid to shareholders, return capital to shareholders, issue new shares or sell assets to reduce debt. The Group has no external requirements imposed upon it in relation to capital structure.

## NOTE 28. OPERATING SEGMENT

For management purposes, the Consolidated Group is organised into one main operating segment, which involves its abalone ranching operations, inclusive of its seeding, ranching and processing activities. All of the Consolidated Group's activities are interrelated, and discrete financial information is reported to the Board (Chief Operating Decision Makers) as a single segment. Accordingly, all significant operating decisions are based upon analysis of the Consolidated Group as one segment. The financial results from this segment are equivalent to the financial statements of the Consolidated Group as a whole. The Consolidated Group operates only in Australia.

## NOTE 29. DIVIDENDS

No dividend was paid or declared by the Company in the period since the end of the financial year and up to the date of this report. ### INDEPENDENT AUDITOR'S REPORT

To the members of Rare Foods Australia Limited

### Report on the Audit of the Financial Report

#### Opinion

We have audited the financial report of Rare Foods Australia Limited (the Company) and its subsidiaries (the Group), which comprises the consolidated statement of financial position as at 30 June 2023, the consolidated statement of profit or loss and other comprehensive income, the consolidated statement of changes in equity and the consolidated statement of cash flows for the year then ended, and notes to the financial report, including a summary of significant accounting policies and the directors' declaration.

In our opinion the accompanying financial report of the Group, is in accordance with the *Corporations Act 2001*, including:

- (i) Giving a true and fair view of the Group's financial position as at 30 June 2023 and of its financial performance for the year ended on that date; and
- (ii) Complying with Australian Accounting Standards and the *Corporations Regulations 2001*.

#### Basis for opinion

We conducted our audit in accordance with Australian Auditing Standards. Our responsibilities under those standards are further described in the *Auditor's responsibilities for the audit of the Financial Report* section of our report. We are independent of the Group in accordance with the *Corporations Act 2001* and the ethical requirements of the Accounting Professional and Ethical Standards Board's APES 110 *Code of Ethics for Professional Accountants (including Independence Standards)* (the Code) that are relevant to our audit of the financial report in Australia. We have also fulfilled our other ethical responsibilities in accordance with the Code.

We confirm that the independence declaration required by the *Corporations Act 2001*, which has been given to the directors of the Company, would be in the same terms if given to the directors as at the time of this auditor's report.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

#### Material uncertainty related to going concern

We draw attention to Note 2 (V) in the financial report which describes the events and/or conditions which give rise to the existence of a material uncertainty that may cast significant doubt about the group's ability to continue as a going concern and therefore the group may be unable to realise its assets and discharge its liabilities in the normal course of business. Our opinion is not modified in respect of this matter.

BDO Audit (WA) Pty Ltd ABN 79 112 284 787 is a member of a national association of independent entities which are all members of BDO Australia Ltd ABN 77 050 110 275, an Australian company limited by guarantee. BDO Audit (WA) Pty Ltd and BDO Australia Ltd are members of BDO International Ltd, a UK company limited by guarantee, and form part of the international BDO network of independent member firms. Liability limited by a scheme approved under Professional Standards Legislation.

### Key audit matters

Key audit matters are those matters that, in our professional judgement, were of most significance in our audit of the financial report of the current period. These matters were addressed in the context of our audit of the financial report as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters. In addition to the matter described in the *Material uncertainty related to going concern* section, we have determined the matters described below to be the key audit matters to be communicated in our report.

### Accounting for Biological Assets

Key audit matter	How the matter was addressed in our audit
<p>The Group's biological assets, as disclosed in Note 8 to the financial report, was a key audit matter as the calculation of the fair value of abalone requires significant estimates and judgements by management.</p> <p>The Australian Accounting Standards require biological assets to be measured at fair value less costs to sell or, in the absence of a fair value, at cost less impairment.</p> <p>The Group have valued the biological assets at fair value less costs to sell. The valuation requires management's judgement in relation to estimating the future selling prices, quantity of abalone, abalone size, mortality and costs to complete.</p>	<p>Our audit procedures included, but were not limited to:</p> <ul style="list-style-type: none"> <li>• considering the appropriateness of the valuation methodology against the relevant Australian Accounting Standards;</li> <li>• testing the mathematical accuracy of the fair value model used by management;</li> <li>• performing a reconciliation of the number of abalone by obtaining the opening balance and comparing the known movements (juveniles planted, harvests and mortalities for the year) to supporting documentation on a sample basis in order to assess the reasonableness of the number of abalone at year end;</li> <li>• counting a sample of abalone on hand at the year-end as part of our year end site visit and comparing this to the Group's count for reasonableness;</li> <li>• performing a sensitivity analysis of the key inputs including the future selling price, abalone quantity and abalone size as these are the key assumptions against which the model is most sensitive to; and</li> <li>• evaluating the adequacy of the related disclosure in Note 8 to the financial report.</li> </ul>

**Other information**

The directors are responsible for the other information. The other information comprises the information in the Group's annual report for the year ended 30 June 2023, but does not include the financial report and the auditor's report thereon.

Our opinion on the financial report does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial report, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial report or our knowledge obtained in the audit or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

**Responsibilities of the directors for the Financial Report**

The directors of the Company are responsible for the preparation of the financial report that gives a true and fair view in accordance with Australian Accounting Standards and the *Corporations Act 2001* and for such internal control as the directors determine is necessary to enable the preparation of the financial report that gives a true and fair view and is free from material misstatement, whether due to fraud or error.

In preparing the financial report, the directors are responsible for assessing the ability of the group to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the Group or to cease operations, or has no realistic alternative but to do so.

**Auditor's responsibilities for the audit of the Financial Report**

Our objectives are to obtain reasonable assurance about whether the financial report as a whole is free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Australian Auditing Standards will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of this financial report.

A further description of our responsibilities for the audit of the financial report is located at the Auditing and Assurance Standards Board website at:

[https://www.auasb.gov.au/admin/file/content102/c3/ar1\\_2020.pdf](https://www.auasb.gov.au/admin/file/content102/c3/ar1_2020.pdf)

This description forms part of our auditor's report.

**Report on the Remuneration Report**

**Opinion on the Remuneration Report**

We have audited the Remuneration Report included in pages 12 to 21 of the directors' report for the year ended 30 June 2023.

In our opinion, the Remuneration Report of Rare Foods Australia Limited, for the year ended 30 June 2023, complies with section 300A of the *Corporations Act 2001*.

**Responsibilities**

The directors of the Company are responsible for the preparation and presentation of the Remuneration Report in accordance with section 300A of the *Corporations Act 2001*. Our responsibility is to express an opinion on the Remuneration Report, based on our audit conducted in accordance with Australian Auditing Standards.

# GOING GREEN & PAPERLESS

JOIN OUR SUSTAINABILITY JOURNEY

## WHY SWITCH TO PAPERLESS CORRESPONDENCE?

### ✓ Save time

Receive announcements and notifications as soon as they are released in the ASX in real-time, instead of waiting for the post.

### ✓ Save space

Reduce the clutter that enters your home, and receive correspondence via email or as digital, paper-free PDF. Compatible with any device.

### ✓ Save the environment

In Australia, each person uses an average 230kg of paper per year. Let's help reduce this waste by going paper-free.

At Rare Foods Australia, we strive to be sustainable and reduce our carbon footprint wherever possible. That means we prefer corresponding via emails vs. a multitude of printed paper. We feel our shareholders echo our thoughts on this and to that end; here are some simple steps to help you move towards Email correspondence when hearing from us.

## HOW DO I ELECT TO RECEIVE ALL CORRESPONDENCE BY EMAIL?

You can elect to receive all correspondence, such as annual reports, notice of meetings, newsletters and more, by email. You can make this election by:

### 1. Using Automic's Investor Portal – [investor.automic.com.au](http://investor.automic.com.au) :

- If you have already registered, simply enter your username and password and click “**log in**”.
- If you have not yet registered, simply click “**register**” and follow the prompts.

### 2. Once you have logged in, click on “**profile**”.

- You can then select “edit” in the Communication Preferences section.
- Once you have selected “Electronic Only” and added your email address, click “save”.

MANY THANKS FOR YOUR SUPPORT AS WE STRIVE  
TOWARDS A MORE SUSTAINABLE FUTURE.
